

# Identix® Fingerlan™ 4.5 Access Control Software

Expand your Fingerscan™ V20 network capabilities

Identix® Fingerlan™ 4.5 enhances the Identix Fingerscan™ V20 physical access network security solution with sophisticated node configuration and network monitoring capabilities. Fingerlan 4.5 includes all the capabilities customers expect from a physical access security solution, such as central management of physical access units, setting up user profiles and auditing transactions from a PC. In addition, Fingerlan 4.5 introduces further advances in both reliability and usability. Giving you more options. Maximizing the potential of your investment.

The screenshot shows the 'Fingerlan IV - [Transaction Report]' window. It features a menu bar (File, Action, View, Window, Help) and a toolbar with buttons for 'Execute Query', 'File Preview...', 'Print Preview...', 'Custom File', and 'Custom Print'. A 'Tasks' sidebar on the left includes icons for 'Setup', 'Network', 'Unit Configuration', and 'User List'. The main area displays a table with columns for Date, Time, Serial, ID Number, User Name, and Unit Name. The table contains 15 rows of transaction data for December 16, 2002.

Date	Time	Serial	ID Number	User Name	Unit Name
12/16/2002	7:57:49 AM	180	1124	Haney,Diane	Employee Entrance
12/16/2002	7:57:54 AM	181	1116	Olsted,Lynn	Employee Entrance
12/16/2002	7:58:09 AM	182	1135	Glazer,Jaf	Employee Entrance
12/16/2002	7:58:12 AM	34	1124	Haney,Diane	Lobby
12/16/2002	7:58:21 AM	183	1135	Haney,Diane	Employee Entrance
12/16/2002	7:58:30 AM	184	1122	Roy,Rob	Employee Entrance
12/16/2002	7:58:39 AM	59	1135	Glazer,Jaf	West Hall
12/16/2002	7:58:42 AM	185	1121	Jagers,Christina	Employee Entrance
12/16/2002	7:58:51 AM	186	1151	Haney,Diane	Employee Entrance
12/16/2002	7:59:00 AM	187	1115	Smith,Jennifer	Employee Entrance
12/16/2002	7:59:33 AM	60	1122	Roy,Rob	West Hall
12/16/2002	7:59:57 AM	35	1135	Glazer,Jaf	Lobby
12/16/2002	8:00:18 AM	188	1119	Dearing,Ed	Employee Entrance

12/16/2002	8:01:06 AM	189	1128	Barber,Vaughn	Employee Entrance

## Superior Authentication and Authorization Policy Management

Extend the capabilities of your Identix Fingerscan V20 units with Identix Fingerlan 4.5. Using Fingerlan 4.5 advanced access control software, you can safely and conveniently control, limit, monitor and audit physical access to any Fingerscan V20-enabled entrance. Fingerlan 4.5 provides a scalable solution and is ideal for networked environments or organizations that desire optimum controlled access to multiple entrances.

## Powerful Configuration and Monitoring Tools

Identix Fingerlan 4.5 access control software maximizes the benefits of your Fingerscan V20 network by providing powerful and easy-to-use configuration and monitoring tools – all on a single PC. Using Fingerlan 4.5, you can create customized user access profiles and generate auditing reports for each Fingerscan V20 unit. Customizable auditing and reporting features provide a valuable audit trail. And information generated from Fingerlan 4.5 can be easily exported to third-party applications such as time and attendance and payroll systems.

**Identix Fingerscan V20 and Fingerlan 4.5 provide a secure solution for any organization that needs to control, restrict and audit a user's physical access privileges.**

Fingerlan 4.5 and Fingerscan V20 enable organizations to:

- Eliminate fraud associated with badge renting, badge lending, and buddy punching
- Set time and date restrictions and implement full or partial access policies
- Maintain an accurate transaction log with the time and date of user access
- Set false acceptance (FAR) and false rejection (FRR) rates based on individual security needs.

## Features

Template Request

## Benefits

- Provides access to information in Fingerlan Database that is not stored on a Fingerscan V20 unit
- Provides greater memory capacity

Remote Enrollment

- All enrollment can be conducted at a centralized location or PC
- No need to locally establish a user policy at each Fingerscan V20 unit
- Significantly reduces time to enroll

Configurable time zones (30)

- Increased security and accountability based on user profiles
- Drop & drag time zone bars make system setup easy

Remote configuration and management of Fingerscan V20 units

- Ability to configure all Fingerscan V20 units from a central PC eliminating the need to configure each unit locally
- Significantly reduces time to maintain and update Fingerscan V20 units

Real time transaction monitoring

- Ability to view transactions as they occur

Adjustable security threshold

- Ability to set security thresholds at the both the system and individual user level

Custom audit reporting

- Enables user to define the variables that will be tracked
- Enables user to print and store historical data

Definable ASCII file output

- Allows user to export information to other applications, such as time and attendance, payroll systems, etc.

## System Requirements/Specifications

### PC Host System Minimum Requirements:

- Pentium II 233MHz
- 128MB of RAM
- 50MB of available hard drive space
- 1 available serial, Ethernet or modem communication port
- Microsoft Windows® 98 or above

### PC Host System Recommended Requirements:

- Pentium III 1GHz
- 256MB RAM
- 200MB hard drive
- Ethernet network
- Microsoft® Windows® 2000 or above

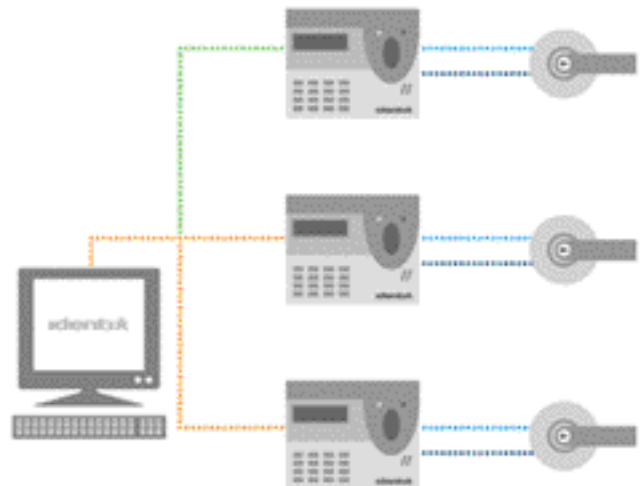

### Specifications:

Fingerprint Template Size: 512 bytes

Communications: Ethernet, modem, RS485, RS232

Product Number: PAC-SW-FL45
